

Osteoarthritis is the most frequent cause of physical disability among adults, impacting both quality of life and finances. Osteoarthritis affects more than 40 million Americans and more than half the U.S. population age 65 or older. Glucosamine is an amino sugar that exists naturally in our body. It is the building block of molecules that gives structure and resilience to cartilage and it is essential for the function and integrity of joints. Glucosamine has been shown to be effective in reducing pain and other symptoms associated with osteoarthritis and to stimulate the regeneration of joint cartilage.

Why a glucosamine supplement?

- Promote healthy and comfortable joints. Glucosamine is the building block of proteoglycan, one of the main structural components of cartilage. Studies show that glucosamine stimulates cartilage cells (chondrocytes) to produce proteoglycans, thus normalising cartilage metabolism and keeping it healthy.
- Slow down the breakdown of cartilage. Studies have shown that glucosamine may inhibit the activity of enzymes responsible for breakdown of cartilage. Glucosamine may also have anti-inflammatory action.
- Help build, repair and regenerate cartilage to reverse the osteoarthritis process. Studies have shown that glucosamine can stimulate chondrocytes to begin producing healthy new cartilage matrix. Glucosamine has been shown to stimulate the regeneration of experimentally-induced cartilage damage.
- Reduce pain and other symptoms associated with osteoarthritis. Many studies have shown the effectiveness of glucosamine in relieving pain

associated with osteoarthritis. Studies show that joint tenderness and restriction of movement also improve with glucosamine supplementation. While glucosamine alone does not produce the immediate dramatic reduction in pain associated with over-the-counter pain relievers and anti-inflammatory drugs like Tylenol® or Advil®, its ability to reduce pain is consistent and increases throughout its use, leading to long-term improvement.

- Glucosamine is quickly and efficiently absorbed from the intestinal tract and is rapidly incorporated into joint cartilage. Studies using tagged glucosamine to allow scientists to follow the compound through the subject's bodies, found that glucosamine did indeed travel to the joints and incorporated itself into the cartilage to help stimulate new cartilage growth.

Why NeoLife Full Motion?

- **Provides 1500 mg of glucosamine**, the “therapeutic” dose shown in studies to reduce pain and stiffness associated with osteoarthritis.
- **Pharmaceutically pure, biologically functional glucosamine** from Glucosamine Hydrochloride - easy to digest and sulfite-free - minimising digestive discomfort and allergic reactions.
- **Natural, high-quality source of purified glucosamine.**
- **Herbal Comfort Complex**, an exclusive blend of White Willow and Boswellia, ingredients strongly associated with the body's natural mechanisms for minimising joint pain and inflammation.
- **Provides zinc** to help ensure there is an abundance of this biologically critical mineral necessary for healthy cartilage.
- **3D Advantage**, which provides optimal bioavailability through maximum Disintegration, Dissolution and Dispersion.
- **Formulated under the direction of the SAB using leading edge science.**

The Full Motion Story

Nature’s comprehensive nutritional solution for optimal joint health and comfort.

The most effective way to overcome the lack of available glucosamine for joint repair, regeneration, maintenance and thus reclaim lost comfort, flexibility and mobility is the direct dietary supply of high purity, pre-formed glucosamine. This is exactly what Full Motion is formulated to do. Each dose delivers the nutritionally significant contribution of glucosamine the body needs to maintain healthy cartilage levels in the face of repeated strenuous exercise or to repair and regenerate damaged cartilage associated with ageing.

A Supporting Cast For Maximum Effect and Benefit:

In addition to the most pure, biologically functional form of glucosamine available, each dose of Full Motion delivers;

Herbal Comfort Complex (HCC) to boost the body’s natural anti-inflammatory capacity and provide additional comfort.

- White Willow – Reduces pain and inflammation.
- Boswellia – Supports connective tissue and joint structure.

3D Advantage - Through the application of NeoLife's leading edge manufacturing technology, Full Motion delivers our “3D Advantage”. This unique technology focuses on and maximises the three critical steps of digestion and optimal bioavailability:

- Disintegration – Tablets quickly breakdown in the stomach.
- Dissolution – Active ingredients quickly dissolve within the stomachs contents.
- Dispersion – Active ingredients disperse widely as stomach contents move into the intestine, maximising bioavailability and user benefit.

By assuring these critical steps take place quickly and efficiently, our “3D Advantage” makes Full Motion the leader of the pack when it comes to product performance and user benefit.

Leading Edge Science Delivers an Unbeatable Combination for Joint Health:

Full Motion was formulated under the direct participation of NeoLife’s Scientific Advisory Board. The combination of ingredients that make up Full Motion are based on leading edge science that shows direct supplementation of Glucosamine, the primary cartilage building block, can support healthy joint function and regenerate lost or damaged cartilage. The result is comfort, flexibility and mobility... Full Motion.

Glucosamine is critical to the formation and maintenance of healthy joints and cartilage. NeoLife's Full Motion is made from glucosamine plus selected herbs and zinc. Not recommended for pregnant or lactating women.

Bottle sealed under cap for protection, do not use if seal is missing or broken.

DIETARY SUPPLEMENT
AUST L 152533
90 TABLETS

DIRECTIONS FOR USE:
Adults take 1 tablet three times daily with water. For best results, take each tablet just before mealtime.

CONSUMER INFORMATION PANEL

| | |
|--|--------|
| Each Tablet Contains: | |
| Glucosamine hydrochloride | 500 mg |
| Boswellia serrata extract | 100 mg |
| (equiv. to dry gum oleoresin 750 mg) | |
| Salix alba twig bark extract dry concentrate | 68 mg |
| (equiv. to dry 680 mg) | |
| Zinc (as zinc gluconate) | 5 mg |
| Derived from seafood. Tabletting aids and colours. | |
| Store below 30°C in a dry area away from direct heat and light. | |
